The information in this document can help you to verify access to Hewlett Packard Enterprise Virtual Labs before your class begins.

Please note:

- The username and password are for pre-class verification use only, and only provide access to a basic access verification lab area.
- When your class begins, your instructor will provide you with your course-specific username and password which provide access to your actual course lab(s) in HPE vLabs.
- For more extensive reference documentation on accessing HPE vLabs, refer to the “Connection Reference Guide” document at https://vlabs.hpe.com/

vLabs gateway

Our lab access gateway is OS-agnostic and has been tested with popular HTML5 compatible browsers including Mozilla Firefox®, Google® Chrome, Maxthon®, Safari®, Microsoft® Internet Explorer11 and Microsoft® Edge.

For more information, refer to our User Guide https://vlabs.hpe.com/guides/vlabs_guide.pdf

Connectivity

Please see the “vLabs Connectivity Requirements” document for a complete description of proxy/firewall and bandwidth requirements for accessing HPE vLabs.

Test Procedure

1. Point one of the approved browsers to connect to https://vlabs.hpe.com/ and click the “Log in to the Virtual Labs Gateway” link highlighted below in the “Access your lab” section.

   ![Image of Virtual Labs Access](image-url)
2. Enter **vlabtest** into the Username field...

3. Enter the password: **VLpass2!**

4. Select your keyboard type if it differs from the default and click **SIGN IN**.

5. Upon successful login, you will see the following screen:

![Virtual Labs Gateway](image)

**You have successfully accessed the HPE vLabs test lab.**

Use the text window to practice copy and paste operations as these are slightly different when using the HTML5 interface, as outlined in the **User Guide**.

6. To complete the pre-course test:
   - Click the “Close Window” button at the bottom of the HPE vLabs page, to exit the lab. You may now close your browser and test another if required.
